

Workshop Internacional de la red CarbonInspired en Madrid

El próximo **miércoles 21 de noviembre**, la red CarbonInspired organizará en **Madrid** un **Workshop Internacional** sobre la *Aplicación de Nanomateriales en la Industria*.

El objetivo de ese evento es proporcionarles a las empresas un marco de encuentro y contacto con expertos relacionados con este ámbito, los cuales presentarán ejemplos de aplicación de estos materiales en productos y procesos industriales, casos reales de éxito, avances de la nanotecnología y potenciales beneficios e inconvenientes de la transferencia al mercado.

El programa incluye charlas de investigadores de los centros tecnológicos y universidades fundadores de la red CarbonInspired, y presentaciones de empresas y agentes industriales que trabajan, han desarrollado o implantado con éxito estos materiales en sus productos y procesos.

Así, este evento totalmente **gratuito**, contará con la presencia de ponentes de talla internacional, procedentes de centros de investigación como CTAG, AIMPLAS, IK4-TEKNIKER, RESCOLL y la Universidad de Aveiro, y con empresas tales como ARKEMA, MAIER, ACCIONA y NANOGAP, entre otros.

International Workshop: Application of Nanomaterials in Industry
Madrid, November 21st 2012

International Workshop of CarbonInspired network in Madrid

Next November 21st CarbonInspired network will organize in Madrid an International Workshop about the Application of Nanomaterials in Industry.

The aim of this event is to provide a framework for enterprises to meet and contact with experts involved in this field, providing them with examples of applications of these materials in industrial products and processes, real successful cases, information about the advances achieved by the nanotechnology and advantages and inconveniences they may find during the transfer to the market.

The program includes lectures given by researchers from the university and the technology centers founders of CarbonInspired network, and presentations from companies and industrial agents that have developed or successfully implemented these materials in their products and processes.

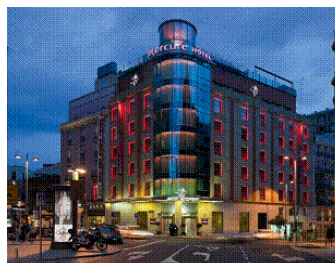

Thus, this free-of-charge event will count with the presence of world-class speaker, from research centers as CTAG, AIMPLAS, IK4-TEKNIKER, RESCOLL and the University of Aveiro, and with companies such as ARKEMA, MAIER, ACCIONA and NANOGAP, among others.

Don't loose this opportunity!
